SUMMARY

Full Stack Developer with more than 4 years of experience, I mostly use Javascript but I'm always ready to learn new technologies and improve my skills. Recently I've been using and enjoying the Hypebeast stack with Nextjs and Expressjs but I'm also comfortable with a variety of frameworks and libraries such as gRPC and Keycloak.
Being hardworking and result oriented, I always work towards delivering high quality products to users while writing performant and maintainable code. I'm also used to working with people from different ethnicities and backgrounds as I had the pleasure to work with teams from China, Oman, Ukraine and more.

SKILLS

ReactJS, NextJS, Redux, SASS, ExpressJS, NodeJS, PostgreSQL, gRPC, Neo4j, Elasticsearch

EXPERIENCE

Full Stack Developer
Groupado   **October 2020 – present, Tunis, Tunisia**
· Built an SSO authentication service that permits users to use one set of login credentials across all Groupado projects using Keycloak and gRPC.
· Helped creating a payment gateway that utilize users location to show different payment methods (Paypal, Checkout.com, Fawry ...). while giving a global insight through an admin dashboard, using Expressjs, Postgres and Nextjs.
· Created a Tags management service with Neo4j as a database, Redis for cache and elastic for fuzzy search.
· Worked closely with the DevOps team to integrate AWS services like S3, Cloudfront and RDS.
· Created Dockerfiles for our Kubernetes environment, used Gitlab CI pipelines and deployed projects to production with Argo CD.
· Wrote unit and integration tests with Jest, Supertest and react-testing-library.
· Maintained and refactored legacy code to better perform with new micro-services.
· Reviewed code for junior developers and assisted interns with their projects.

MERN Stack Developer
Target Energy Solutions   **March 2020 – September 2020, Tunis, Tunisia**
· Built micro-services with Nodejs and Expressjs and MongoDB.
· Improved applications through turning mutual features and functionalities into Microservices.
· Created gRPC endpoints to communicate between Microservices efficiently.
· Introduced a local development environment with docker and docker-compose.

React.js Developer
Target Energy Solutions   **July 2018 – March 2020, Tunis, Tunisia**
· Collaborated with an international team on large scale applications for data-driven industries and Provided digital transformation solutions for clients as big as Petroleum Development Oman.
· Created reusable and generic components using React, Redux and SASS.
· Consumed GraphQL, gRPC and REST APIs.
· Optimized components for maximum performance across different browsers.
· Worked effectively with members from different departments during all stages of application development.

Frontend Developer
Medianet   **October 2017 – June 2018, Ariana, Tunisia**
· Produced a range of projects, designing appealing websites and interacting on a daily basis with graphic designers, back-end developers and marketers. examples: djerbaplaza.com – saveursdusahara.com – dareljeld.com
· Integrated mobile-first websites using HTML, SASS and jQuery.
· Ensuring SEO friendly structure.
· Optimizing websites for maximum speed using Gulp.

PFE Internship
Techpoint   **January 2017 – June 2017, Ariana, Tunisia**
